## Portfolio Description

The objective of this model portfolio is to achieve long-term capital growth and stability by allocating a significant portion of the portfolio to Nigerian large-cap stocks, focusing on industry leaders with strong competitive advantages and the resilience to withstand macroeconomic uncertainties, and maintaining strategic allocation to mid-to-small cap stocks to capture additional growth opportunities. Overall, our stock selection emphasizes consistent revenue growth, healthy ROE and ROA, low leverage, robust free cash flow, and moderate volatility, complemented by a select group of quality dividend aristocrats to enhance resilience and provide steady income. The remaining 5% is allocated to a gold fund, serving as a hedge against inflation and currency volatility.

Asset Allocation	Net	%Long	%Short
